

Nexgen Parking Cylinder & Vault Door

Unattended parking meters make tempting targets for thieves, and stolen or misused keys can result in lost revenue that is impossible to trace. That's why so many cities turn to Medeco for complete parking meter protection.

NEXGEN® technology provides a streamlined system for physical security, access control, and accountability. The NEXGEN system is entirely self-contained, eliminating the need for a hand-held computer. The lock contains no mechanical pins and is built to withstand physical attacks such as punching and drilling. Keys can be automatically programmed in groups using the NEXGEN Security Manager – Parking Edition software system.

Keys only open the meters you specify and will not operate outside of their time schedules. Both lock and key hold complete records of every opening – or attempted opening – of the meter. NEXGEN virtually eliminates your exposure due to lost or stolen keys while improving efficiency of your collections.

Benefits:

- ▼ Control access to every meter.
- ▼ Track all openings and attempted openings.
- ▼ Strong resistance to physical attack.
- ▼ No hardwiring for easy installation.
- ▼ Can be electronically re-keyed for immediate response to lost or stolen keys.

Applications:

Parking installations that require access control and audit capabilities.

Warranty:

1 year manufacturer's warranty

Technical Information:

Available with standard or high capacity bracket.

Plug face and plug use hardened steel inserts to resist drilling.

Lock stores up to 2000 audit events.

Finishes:

Grey powder coat standard

Black powder coat available as special order
