With a shrouded shackle for extra security, these rekeyable solid steel padlocks offer the greatest protection against cutting and prying attacks. They have hardened, chrome plated solid steel bodies that resist cutting, sawing and corrosion; hardened boron alloy steel shackles for superior cut resistance; and the A748 has stainless steel cylinder pins for increased drill resistance.

Round Body Padlocks

American Lock round body padlocks offer the greatest security and fit for real world applications. They're virtually indestructible, with hardened, chrome plated solid steel bodies that resist cutting, sawing and corrosion and hardened boron alloy steel shackles that offer superior cut resistance.

Five- and six-pin brass cylinders and dual ball bearing locking mechanisms resist picking, pulling and prying. They're ideal for securing security gates, sheds, truck and van doors, industrial machinery and construction equipment.

Enhanced keying option includes:

BumpStop® Advanced Cylinder Technology and Edge™ Key Control.

Includes A700, A701, A702, A703, A706 and A707, with specifications listed below.

2-1/2" (63mm) wide x 1-1/8" (28mm) thick chrome plated solid steel body; 7/16" (11mm) diameter, 15/16" (24mm) horizontal clearance boron shackle
